

On 18-19 March a group of experts gather in Budapest at the EELISA Workshop on AI Ethics and Law. In four panel discussions, they will investigate the possible research directions in the topic, as well as the implications of regulation,

especially on Copyright matters and the EU AI Act. The event will also feature a future forecasting method and a documentary screening.

Confirmed participants

Daniele Cavalli - Ecole normale supérieure Paris, France
Philosophy of Artificial Intelligence and Cognitive Science, STS, Critical Data Studies

Merve Calimli Akgun - Istanbul Technical University, Turkey
Political Science, International Relations and Globalization
